

TAKE YOUR LAMINATOR PRODUCTION CAPABILITY TO THE NEXT LEVEL.

Increase performance by replacing current components with improved technology that results in higher yields, reduction in lane to lane variability and reduced cycle times. This upgrade can be performed at your facility with minimum down time

Improved nozzle design

Our new and improved Microswirl 360° nozzles and Tight Seal System reduce heat and airflow loss. Yielding more consistent output, reducing scrap and allowing decreased cycle times to increase overall volumes

Universal 0-34mm grippers

Newly designed universal grippers remove the need for custom grippers for each product size ranging from 0-34Fr. Reducing cost, saving time and increasing functionality.

Optional centering guides

Newly designed, easily adjustable, centering guides remove the need for custom guides for each product size ranging from 0-34Fr.

Digital air flow meters

Upgrade to the digital flow meters for more repeatable recipe set up and consistent lane to lane flow and temperature output.

VS1000+ Upgrade includes:

- Onsite installation and training
- Four (4) improved Microswirl 360° Nozzles with Tight Seal System
- Installation of new universal gripper rack
- Upgrade to digital air flow meters
- Upgrade from obsolete Windows XP
- Optional safety door
